ANNOUNCEMENT

WITH the concentration of all our nursery grounds and equipment at North Wilmington, Mass., we are now in a position to carry on the business at a large reduction in expense, and in turn reduce our prices very materially without in any way affecting the quality of the stock. We thank our many friends for the liberal patronage accorded us in the past fifty-nine years and can assure you that we shall fully appreciate your continued favors.

Catalogues.—The general public is so well informed as to kinds and their qualifications that a full descriptive catalogue is not of the importance of years ago. The following Price List is of actual material growing with us in new soil under the most favorable conditions and which can be shipped immediately on the opening of the shipping seasons.

The following publications are for free distri-

bution:-

- Manning's Monograph No. 1. Berry-bearing Plants. A full description of the effects possible and the very various kinds of Berrybearing Plants. A standard.
- Manning's Monograph No. 2. Hardy Rhodoendrons, Azaleas and The Mountain Laurel. Giving complete cultural directions and full descriptions of the varieties. Very complete.
- **Hardy Flowers.** A complete treatise on the possibilities in ornamental gardening work in this valuable class and full description of the best varieties and their individual possibilities.
- Evergreens for Winter Effect. A Lecture before the Mass. Horticultural Society, Jan. 12, 1901.
- A Descriptive Catalogue, arranged with a view to the special classification and adaptation of the best hardy plants. Including Rhododendron and Azalea Gardens. Sea-shore Planting Problems. Berry-bearing Shrubs, etc.

This List Annuls all Prices in Previous Editions

PLANTING ADVICE

For twenty-five years past we have supplied full landscape plans for hundreds of clients throughout the country. We are prepared to supply such in all cases where the necessity of the case requires it. Generally within short distances a first visit is made free of charge. This visit may prove it is unnecessary to go to the expense of carefully drawn plans to scale, as simple sketches without cost may prove sufficient. The problem is considered in all its phases and advice freely given at this first visit. Should it prove necessary to undertake carefully drawn plans with attendant surveys and studies, details as to terms for such may be arranged at this first visit.

Large and Small Fruits.

Varieties of fruits that may be well adapted to one section of the country may prove failures elsewhere. For New England a selection of the varieties best adapted to our soils and climate must be dependent on the sixty years' experience which we have had. We submit herewith such a list. Our stock is practically exclusively New England grown, a factor of no small importance in after results.

Each.	Ten.	Hund.
APPLES. Standard Trees. Heavy. 5 to 6 ft. \$0 60	\$5 00	\$40 00
Standard Trees. Medium grade. 4 to 5 ft 50	4 00	35 00

SPECIAL OFFER. We will supply 100 Ornamental Flowering Shrubs of our own selection in ten or more varieties in which Spiræas, Lilacs, Syringas, Forsythias and Viburnums will be included for \$20.00 net.

* All evergreens are indicated with a star.

Azaleas.

Our Monograph on Rhododendrons, Azaleas and The Mountain Laurel is a very complete guide to the hardy varieties of these brilliant flowered subjects with complete description of their kinds and full cultural directions. Free for the asking. Azaleas are particularly successful under New England soil and climatic conditions and have been a specialty with us for over fifty years; with this wide experience we are prepared to offer those best suited for your own requirements. Each. Ten. Hund. Quotations are for carefully grown nursery stock.

Rhododendrons.

With an experience of nearly sixty years in the Landling of this most valuable class of ornamental evergreens we are in a position to advise that will insure the best results in after planting. Where deemed desirable we will make a visit on request only to learn your possibilities and advise as to your needs. Our Monograph of Rhododendrons, Azaleas and the Mountain Laurel is considered a standard and gives full cultural and other advice. It is free for the asking. Our stock is only imported from the most reliable sources and is grown for us with a special view to the production of sturdy, well rooted material, and we only deal in those few varieties which our long experience has proved worthy of general use.

HYBRID ROSES.

Recognizing that it is far more important to know those varieties that give the greatest return in hardihood and flowers, than to select from a confusing list, many of which too closely resemble each other; we can recommend the following. The plants are of the best quality and not culled from auction rooms.

THE BEST TWELVE HYBRID PERPETUAL ROSES.

Alfred Colomb. Bright Crimson; fragrant.
Anna de Diesbach. Carmine pink; fragrant.
Baroness Rothschild. Light pink.
Captain Hayward. Deep pink, of finest form.
Frau Karl Druschki. Purest White. A constant bloomer.
Gen. Jacqueminot. Glowing crimson,; fragrant.
Jules Margotten. Crimson rose.
Mabel Morrison. White tinged blush.
Magna Charta. Bright carmine pink.
Madam Gabriel de Luizert. Delicate pink. Fragrant.
Ulrich Brunner. Cherry red; early and late.
Extra strong 2 yr. plants, 40 cts. each; \$3.50 per ten; \$25.00 per hundred.
The above set of twelve. \$4.00. Varieties Net.

THE BEST HYBRID TEA ROSES.

Tea Roses are not hardy in the full sense of the word, but with ample covering of manure and litter, in the winter months can be carried on for years. No class combines more continuous summer bloom or such rich combined with charming fragrance.

Caroline Testout. Silvery pink; deliciously fragrant.
Grus au Teplitz. Deep crimson; fragrant; prolific.
Gloire de Dijon. Yellow with orange markings markings;

deliciously

fragrant.

Kaiserin Augusta Victoria. White; fragrant; in showy clusters.

Killarney. Deep pink in very large petalled flowers; fragrant.

La France. Silvery rose; fragrant.

Liberty. Glowing crimson; fragrant.

Madam Abel Chatenay. Salmon pink; fragrant.

Souv. de Pres. Carnot. Pale pink; fragrant.

Extra strong 2 yr. plants, 50 ets. each; \$3.00 per ten; \$30.00 per hundred.

he above set of Nine Hybrid Tea Roses. \$2.50. Net,

THE BEST MOSS ROSES.

Blanche Moreau. Double white; fragrant. Crested Moss. Deep pink; buds beautifully mossed. Salet. Double; light rose pink. \$0.50 each; \$4.00 per ten; The set of three for \$1.25. Net.

FOUR IRONCLAD ROSES FOR EVERYONE.

Harrison's Yellow. Semi-double clear yellow.

Madam Plantier. White tinged blush in large showy clusters borne
in greatest profusion.

Red Rugosa. Single crimson flowers in showy clusters all summer.

Red Rugosa. Sing Beautiful foliage

White Rugosa. Purest white flowered, companion to the last. Strong plants. \$0.35 each; \$3.00 ten.

The set of four for \$1.00. Net.

^{*} All evergreens are indicated with a star.

DWARF EVERBLOOMING ROSES.

A most valuable class best known by the showy Baby Rambler; forming low bushy plants which commence blooming in mid-June and continue in constant succession of flowers until hard frost. A class that is bound to have wonderful popularity and in which rapid improvements in variety of color and habit will rapidly follow.

Each. Ten.

Viburnums.

The Virburnums are among our most highly prized flowering shrubs and with their added merit of particularly striking fruiting effects are quite indispensable for general ornamental planting work. While the flowers are all white yet they range in season of bloom and character of flower heads from the flat showy cymes of some types to dense rounded clusters and again to showy globular masses so familiar in the Snowball types. The fruits range from black in some forms through shades of red to brilliant crimson and bright steel blue in the V. dentatum. The fruiting effect is largely made use of to continue the interest of the plants long into the winter, this being especially noteworthy in the Highbush Cranberry which retains its scarlet clusters of fruits throughout the winter.

SPECIAL OFFER OF HARDY VINES.

We will ship, carefully packed, our own selection of 25 vines in at least 6 distinct kinds for \$5.00 net.

SPECIAL OFFER FOR AN OLD-FASHIONED GARDEN.

We will supply, well packed, our own careful selection of 500 Hardy Herbaceous Flowers consisting of at least 40 distinct kinds and including among others Phlox, Iris, Campanulas, Lychnis, Monarda, Veronicas, Spiræas, Rudbeckias, Thermopsis, Anemones, Columbines, Asters, Coreopsis, etc., for \$35.00 net. These will well plant a garden of 750 square feet area.

Hardy Herbaceous Flowers.

About thirty years ago this valuable class of ornamental plants were largely introduced by us, and during the intervening period we have fully tested more than three thousand varieties, a large number of which we in our wide experience have proved not sufficiently desirable to recommend for general use. We here offer those varieties which in this long test we find possess distinction and such valuable flowering qualities to recommend them. We can supply many other sorts but confine ourselves to the following as the best. Herbaceous flowers are of the highest value, possessing wonderful variety in habit and season of bloom and the greatest possible range of flowering effect; with these one planting completes the expense as compared with tender plants requiring annual renewal.

Designs for Flower Gardens are constantly being made and we will be pleased to assist you in this regard if desired.

Ferns. For shady situations no class of plants can equal Ferns which are very easily grown in ordinary soils and will thrive where it is often impossible to make flowering plants succeed. We handle many thousands each year and would highly recommend the following for general use but can supply a much extended list to those especially interested in making a more complete collection

Each. Ten. Hund. Thousand \$1 75 1 25 \$10 00 8 00 $\begin{array}{ccc} 1 & 25 \\ 1 & 25 \\ 1 & 25 \end{array}$ 10 00 8 00 80 00 60 00 Ten. \$1 25 Hund Blue \$1 \$8 00 10 00 8 00 25 25 25 25 1 10 00 10 00 1 25 10 00 1 2a 2 00 8 00 8 00 White.

GERMAN IRIS.

Of these we have a superb collection to which we are constantly adding new varieties and discarding such as fail to show improvement over standard sorts. No garden is complete without a fair selection of these most beautiful hardy flowers. We recommend that they be planted in large groups, masses and lines, as in this manner they are most effective additions to any garden. We give below the cream of those many varieties that we have collected together for many years past. Many new varieties are under our observation which if proving distinct additions will be offered later. The following are selected for their distinction and fully cover the range of color.

Amos (Atroviolacea). 2ft. Dark violet. Early \$0 Augustina. 18 in. Yellow; veined maroon. Celeste. 30 in. Mid-season. Soft lavender. Duc de Nemours. 30 in. Mid-season. Blue	15 15 15	\$1 25 1 25 1 25	\$10 00 8 00 8 00

Pæony Festiva maxima.

Peonies.

The appreciation of this valuable class is a full testimony of their worth. As the public fully realizes the great range of colors and their divers form and season of bloom they will plant them in even greater number than in the past. The great confusion in the names leads to the offering of many varieties which have no distinction. The following list is selected to cover the range of color and season embraced in the class and can be fully recommended.

Each. Ten.

Agida. Double. Deep, glowing red crimson	\$0	25	\$2

The eight registing noted above are especially reducible	for or	ronano on

The eight varieties noted above are especially valuable for evergreen edging purposes or for low mass effects at the front of flower borders. All are evergreen and all bear abundantly in early summer myriads of flowers.

HYBRID PHLOX.

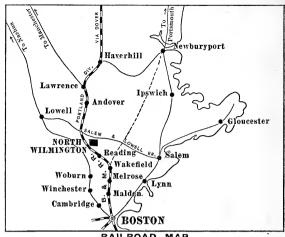

Another indispensable class of border plants in which great improvements have been made of late years. It is possible now to have a continuous effect of flowers in this class alone from June to hard frost. Of the hundreds of varieties offered we have selected the following as best representing the class in range of season, habit and color. Where old varieties are offered it is because no advance has been made over these particular sorts in their color or season of bloom.
